

Wisconsin All-State Team Selection Criteria

The All State Race that the NSCA posts on their website and uses to determine the NSCA WI All State team, removes All American and All Zone team members before running the stats.

For the determination of “our” WI All State team selection, the NSCA has forwarded an all-inclusive list, on which those members were added back to the stats and then run.

We further disregard the win points on the print outs and use only state points to determine our WI Win Points. WI Win Points are added to the SCO (State Score) Points for total points.

The higher state shoot score breaks a tie. Once Open Team is determined, those five shooters are removed from their prospective class (can only be from Master or AA) and the totals for those classes are redone without those shooters.
